### How it works

1. Print at 100% (actual size) on US Letter paper.
2. Use a black pen or marker. Don't use pencil or light colors.
   The app won't be able to detect them.
   Sit letters on the baseline and keep every stroke inside its box.
3. Scan or photograph each page flat at 300 dpi, facing up,
   with the arrow at the top and all four corner squares showing.
   Use at least 100 dpi. Lower may give a poor-quality font.
4. Open saboteur.supply, add your scans and download
   your font. It all runs in your browser.
